

Third SAICM Progress Report 2014-2016 (1 May 2017)

A joint draft workplan, prepared by the SAICM secretariat and the World Health Organization (WHO), is set out below with the indicative timeframe for undertaking the Strategic Approach progress reporting activities for 2014 – 2016. The progress report was requested by the fourth session of the International Conference on Chemicals Management (ICCM4) Resolution IV/1.

Since the second meeting of the ICCM5 Bureau, the online survey tool has been finalized and is attached. The purpose of the tool is collect information to be included in the third report on progress in implementation of the Strategic Approach.

Regional and sectoral focal points are encouraged to share this information with their regions and sectors and to encourage wide scale participation in the survey. The online survey tool will be open for input towards the end of May 2017. The purpose of sharing this tool in advance is to allow stakeholders the opportunity to get started in answering the questions and to share the questions with their collaborators and partners.

Third SAICM Progress Report 2014-2016

This online survey tool is for collecting information to be included in the third report on progress in implementation of the Strategic Approach on International Chemicals Management (SAICM), as requested by the fourth session of the International Conference on Chemicals Management (ICCM4) Resolution IV/1.

SAICM stakeholders are invited to complete the survey by **15 September 2017** so that your activities may be reflected in the report.

Welcome & General Information

Welcome to the online tool for reporting progress in implementation of the Strategic Approach to International Chemicals Management (SAICM) for the period 2014-2016.

Background

In September 2016, through [Resolution IV/1](#), the Fourth session of the International Conference on Chemicals Management (ICCM4), requested the SAICM secretariat to develop a third progress report including achievements, strengths and weaknesses for the period 2014-2016.

The third progress report will be based on information submitted by stakeholders through this online survey and supplemented by international and other data sources. A draft report will be presented to the third Open-ended Working Group of ICCM (OEWG3) to be held at the end of 2018. Respondents to the survey will be acknowledged at OEWG3 and ICCM5. The progress report will also inform the intersessional process to prepare recommendations regarding the Strategic Approach and the sound management of chemicals and waste beyond 2020.

Your participation in this process is necessary to ensure that the third SAICM report on progress can provide a complete and accurate picture of SAICM implementation and provide useful information to assist in setting future priorities for the global sound management of chemicals and waste.

You are asked to provide a single consolidated response for your country or organization by **15 September 2017**.

The Survey

The survey tool is aligned with the 20 indicators agreed to at the second session of ICCM (ICCM2) in May 2009 (see [Modalities for reporting by stakeholders on progress on implementation](#) for more information).

The online survey tool is made up of six parts, as follows:

- Part A: Contact information
- Part B: Risk reduction
- Part C: Knowledge and information
- Part D: Governance
- Part E: Capacity building and technical cooperation
- Part F: Illegal international traffic

The first part (Part A) collects contact information on the identity of the government or organization submitting the response. Only aggregated/anonymized results will be included in the report. Contact information is required in case there is a need to clarify a response.

The five parts that follow contain a series of questions to gather information on each of the 20 indicators. Throughout the survey, there are questions specific to health sector engagement in certain activities. Responses to these questions will be used to help measure progress in implementing the [Strategy for strengthening the engagement of the health sector in the implementation of SAICM](#) adopted in 2012 at ICCM3.

To simplify the survey for respondents and to aid data analysis, most questions are 'multiple choice' type questions where respondents are asked to choose from a list of possible responses. Throughout the survey, there are spaces to provide additional details, if desired. Where 'other' or 'not applicable' has been chosen, additional explanations are encouraged.

Please note:

- Your link to this survey is unique and can only be used to submit one survey response. You are requested to consult as necessary and appropriate, and provide a single consolidated response for your country or organization.
- Each part of the survey should be completed by all stakeholders whether in government, intergovernmental organizations or non-governmental organizations.
- You can save the survey at different points and resume completion at any time before the deadline.
- Mandatory questions are marked by an asterisk (*). If any mandatory questions are left unaddressed, the system will provide prompts to identify where the missing answers are.
- Once you click submit, you will be given the opportunity to print your survey response but you will not be able to access the survey again using the link provided to your government or organization.

To facilitate your discussions and data collection, a downloadable copy (PDF) of the survey questions is available at the link below. However, please use the online survey tool to submit your answers.

- Copies of reports submitted by governments or organizations for the 2011-2013 reporting period are available on the [SAICM website \(archived version\)](#). *Please note that the survey has been modified from previous versions based on feedback received, in particular: the questions have been simplified and the time period clarified; some questions have been removed where alternate sources of information are available and/or the responses were inconsistent; a small number of questions have been added which more directly address the indicator and/or are better aligned with the OOG; and, the Risk Reduction (Part B) questions have been reorganised.*

In a **periodic monitoring** programme sampling and testing is repeated at specific intervals over a period of many years which allows for the establishment of general trends in a population or environmental matrix.

Short term monitoring would normally be related to a specific issue in a target population or location and is intended to identify or monitor specific issues, e.g., blood-lead levels in school children or pollution in a waterway following a spill.

Surveillance refers to more passive data collection, e.g., incidents of chemical poisonings (human or wildlife), chemical incidents etc.

Part E: Capacity-building and technical cooperation

ICCM2 selected six indicators to measure progress on the Capacity-building and technical cooperation objective included in SAICM's Overarching Policy Strategy, including one indicator on SAICM's Quick Start Programme Trust Fund(QSP). Information on the QSP indicator will be compiled from sources held by the secretariat.

The five remaining indicators relevant to this part of the survey are:

- Financial and in-kind resources to assist capacity-building and technical cooperation;
- Identification and prioritization of capacity-building needs;
- Regional cooperation on sound chemicals management;
- Development assistance programmes that include sound chemicals management; and
- Other sources of funding for capacity-building.

*Self-identification

The relevance of many of the indicators for this objective depends on whether a country or organization is primarily a donor or a recipient of capacity building assistance. Therefore, the questions asked in this part will be based on your self-identification as either a donor or recipient. If you prefer to have the opportunity to answer all the questions, simply select "both".
