**Regional meeting on the Strategic Approach to International Chemicals Management****Update on the Quick Start Programme and its trust fund****I. Financial update of the Trust Fund**

1. The Quick Start Programme was established in 2006 by the International Conference of Chemicals Management (ICCM) at its first session to support initial capacity-building activities for the implementation of the Strategic Approach to International Chemicals Management (SAICM). From the date of its establishment to December 2017, the Quick Start Programme has mobilized a total of over US\$47.6 million. This amount includes approximately US\$37.8 million in cash contributions to the Trust Fund and over US\$9.8 million in cash and/or in-kind contributions from project implementers and Executing Agencies.

2. Since 2006, the Trust Fund has received contributions from the Governments of Australia, Austria, Belgium, the Czech Republic, Finland, France, Germany, Hungary, India, Madagascar, the Netherlands, Nigeria, Norway, Pakistan, Republic of Korea, Romania, Slovenia, South Africa, Spain, Sweden, Switzerland, the United Kingdom and the United States of America, as well as from the European Union.

3. All the 184 approved projects would be funded, and that the total value of the whole portfolio is approximately US\$38.5 million.<sup>1</sup>

**II. Decision about the closure of the Trust Fund**

4. At its third session, the International Conference on Chemicals Management decided to extend the term for contributions to the Quick Start Programme Trust Fund until its fourth session (ICCM4). The Trust Fund is consequently closed for new contributions since ICCM4, held in Geneva from 28 September to 2 October 2015. However, the Conference agreed that funds committed to projects before the closure of the Quick Start Programme Trust Fund may be disbursed until all approved projects in the portfolio of the Programme are completed.

5. The Conference delegated to the Executive Board of the Quick Start Programme the decision on the date for the full and final closure of the Quick Start Programme Trust Fund, acting on a recommendation from the secretariat. The Conference noted that this closure will take place before the fifth session of the International Conference on Chemicals Management, and that the Executive Director of the United Nations Environment Programme should be informed at least six months in advance of the closure.

6. The 11<sup>th</sup> meeting of the Executive Board of the Quick Start Programme was held on 14 December 2017. At this meeting, the Board decided that the date for the full and final closure of the Trust Fund and the end of the QSP will be 31 December 2019.

---

<sup>1</sup> All the approved projects were funded because the unspent balance of the secured funding to projects was used to cover the deficit between secured cash contribution and the value of the portfolio.

### III. Quick Start Programme Trust Fund projects

7. Since its establishment, there have been 14 application rounds to the QSP Trust Fund. The secretariat screened project proposals for completeness and eligibility, and submitted 341 applications for appraisal by the QSP Trust Fund Implementation Committee. Over the 14 application rounds, the Committee approved 184 projects spanning 108 different countries, of which 105 are on the OECD DAC list. These include 54 Least Developed Countries (LDCs) and/or Small Island Developing States (SIDS) (Annex B, Summary of QSP projects and eligibility for support from the SAICM Quick Start Programme Trust Fund (round 1 to 14)). Regionally, 40 projects were approved in the African region, 30 in Asia and the Pacific, 28 in Latin America and the Caribbean, and 10 in Central and Eastern Europe (see figures 6 and 7 in Annex A).

8. Furthermore, over 14 rounds, 129 civil society applications have been processed by the secretariat. All projects received an assessment of their compliance with eligibility and completeness criteria. Of these projects, 21 were subsequently approved by the Trust Fund Implementation Committee, which represented around 11% of total projects (see figures 2 and 3 in Annex A).

9. Distribution of approved QSP projects across each of the three strategic priorities of the Programme<sup>2</sup> has been a key consideration of the QSP Trust Fund Implementation Committee in reviewing projects for funding. In almost all of the 14 rounds (with the exception being round two), projects were approved addressing each of the three priorities. Overall, strategic priority A (profile/needs assessment) and strategic priority B (programmes, plans etc. building upon international agreements and initiatives) have received the greatest degree of attention (see figures 8 and 9 in Annex A). The trend in rounds 11 to 14 was for a considerably larger proportion of projects addressing strategic priority C.

10. Sectoral balance has been achieved across the 14 rounds. Overall, the environment sector dominated in the total number of projects, followed by health, other/multisector, agriculture, industry, labour and science (see figures 4 and 5 in Annex A). However, the trend over time has been toward greater sectoral coverage of projects as the rounds progressed.

11. As at December 2017, the secretariat had finalised or was in the process of finalising funding agreements for all the approved projects. Detailed information about all the approved projects can be found in Annex D Status of projects funded under the Quick Start Programme Trust Fund.

### IV. Quick Start Programme non-Trust Fund

12. At its first meeting, held from 26 to 27 April 2006, the Quick Start Programme (QSP) Executive Board requested the secretariat to draft a reporting form for non-Trust Fund QSP contributions. The draft form was prepared to assist reporting on non-Trust Fund contributions as well as in relation to determining participation in meetings of the Executive Board<sup>3</sup>. The draft form was revised and adopted by the Board at its second meeting, held from 23 to 24 April 2007. In

<sup>2</sup> The strategic priorities defined by the ICCM highlight that the QSP should mobilize resources for national priority initial enabling activities in keeping with the work areas set out in the strategic objectives of section IV of the Overarching Policy Strategy, in particular:

- A) Development or updating of national chemical profiles and the identification of capacity needs for sound chemicals management;
- B) Development and strengthening of national chemicals management institutions, plans, programmes and activities to implement the Strategic Approach, building upon work conducted to implement international chemicals-related agreements and initiatives;
- C) Undertaking analysis, inter-agency coordination, and public participation activities directed at enabling the implementation of the Strategic Approach by integrating – i.e., mainstreaming – the sound management of chemicals in national strategies, and thereby informing development assistance cooperation priorities.

<sup>3</sup> Rule 2, Representation, of the Rules of procedure of the Quick Start Programme Executive Board establishes: “Entities that have made or pledged to make in-kind or other contributions to the Quick Start Programme during the period between the most recent and next session of the International Conference on Chemicals Management. Each contributor or grouping of contributors shall be represented by a representative, whose name shall be submitted to the secretariat before the meeting. The Board shall, before its next meeting, determine whether new contributions qualify as contributions to the Quick Start Programme according to the objective of the Programme set out in resolution I/4 adopted by the Conference at its first session. Such entities shall not be entitled to vote in relation to matters concerning the review of the Quick Start Programme Trust Fund.”

advance of each Executive Board meeting, contribution declaration forms are received and compiled by the secretariat.

13. From 2006 to 2017, the declared non-Trust Fund contributions reached a combined total of approximately US\$88.5 million. The contributors for 2006–2017 have been the Governments of: Canada, Japan, Switzerland, Sweden, the United Kingdom and the United States of America. Intergovernmental organizations: the Food and Agriculture Organization of the United Nations (FAO), the United Nations Development Programme (UNDP), the United Nations Environment Programme (UN Environment), the United Nations Industrial Development Organization (UNIDO), the United Nations Institute for Training and Research (UNITAR), the World Health Organization (WHO), and the Organisation for Economic Cooperation and Development (OECD). Additional non-governmental donors have been: Argentine Society of Doctors for the Environment (AAMMA), the BASF, the Dow Chemical Company (DOW), International Council of Chemical Associations (ICCA), the International POPs Elimination Network (IPEN), and the International Society of Doctors for the Environment (ISDE).

## **V. Secretariat support to the Quick Start Programme**

14. The functions of the secretariat in relation to the Quick Start Programme are set out in ICCM resolution I/4 and include:

- To facilitate meetings of the QSP Trust Fund Implementation Committee and the Quick Start Programme Executive Board; and
- To provide administrative support to the Quick Start Programme and its trust fund.

15. As at December 2017, the staffing levels in the SAICM secretariat working on the Quick Start Programme comprised a P-3 Programme Management Officer and a P-2 Associated Programme Management Officer.

### **(a) Meeting facilitation of the QSP Trust Fund Implementation Committee and the Quick Start Programme Executive Board**

16. As of December 2017, the secretariat had convened and serviced eleven meetings of the Executive Board and eighteen meetings of the Trust Fund Implementation Committee. The secretariat coordinates preparation and follow-up for each meeting with the meeting chair or co-chairs. For each meeting, the secretariat develops detailed reports on the status of the Trust Fund and the projects funded through the Fund, and other issues related to the administration of the Quick Start Programme.

### **(b) Administrative support to the Quick Start Programme and its Trust Fund**

17. As of December 2017, 179 agreement documents had been completed and signed from the 184 approved projects over the 14 rounds. The lengthy consultations with project implementers and Executing Agencies are delaying the processing of these agreements. In parallel, the secretariat is also focusing on the closure of projects working very closely with project implementers, Executive Agencies and UN Environment Administration.

18. As part of its administrative duties, the secretariat monitors the progress of funded projects. Each project must submit half-yearly narrative and financial reports, a mid-term and/or final monitoring and evaluation report, as well as final narrative and expenditure reports and the deliverables produced by the project. The secretariat oversees the submission of these documents, gives feedback; supports project implementers providing them guidance; requests payments; and assesses the overall performance of the projects. Moreover, the secretariat supports and addresses the budget revision and extension requests, working with project implementers, UN Environment Administration and the QSP Trust Fund Implementation Committee. If remedial action is required, the secretariat consults the QSP Trust Fund Implementation Committee for guidance.

19. The secretariat also facilitates the conclusion of agreements with donors and any necessary reporting to contributors and donors. These tasks are coordinated with UN Environment Chemicals and Health Branch Administration and the Treasury Section of the Budget and Financial Management Service of the United Nations Office at Nairobi.

### **(c) Information sharing and communications**

20. The secretariat continues to gradually increase its efforts in dissemination of information, particularly lessons learned on the Quick Start Programme. For example, outreach materials

---

developed such as infographics showing information and graphics of all QSP projects (Annex A, figures 13 to 18), have been distributed in different events – e.g. briefings organised by the Geneva Environment Network.

21. The secretariat has revamped the SAICM web page. The Quick Start Programme section has been modified to be more user-friendly and provide an easier access to information - the link to the QSP is now at the front page. One of the changes introduced is that it now includes a story from the field, which describes from beneficiaries' perspective the impact that a particular QSP project has had in their lives. Furthermore, the impact evaluation of the Quick Start Programme is also made available. In addition, the development of an interactive map with information about all the projects is planned. The secretariat is working on these improvements and closely working with the implementers drafting the stories together.

22. Moreover, the SAICM secretariat has made presentations on the Quick Start Programme and other topics relevant to SAICM to various stakeholders involved in projects. In addition, the secretariat is responding to different specific information demands working with partners such as the Special Programme secretariat, UN Environment Regional Chemicals and Waste Coordinators, UN Environment Global Environment Facility team, and the Secretariat of 10 Year Framework of Programmes on Sustainable Consumption and Production, among others.

23. The Inter-Organization Programme for the Sound Management of Chemicals (IOMC) meetings usually have an item dedicated to the Quick Start Programme and its trust fund. The Strategic Approach secretariat thus briefs the IOMC Participating Organisations on the QSP. In addition, the ICCM5 Bureau is also briefed at its meetings on the developments of the Programme.

24. The secretariat continues to work identifying opportunities to showcase projects and improve visibility. In addition, a communications strategy has been drafted for the Strategic Approach, including the Quick Start Programme.

**NOTE: When appraising the applications, the QSP Trust Fund Implementation Committee uses the following criteria:**

- it gives priority to countries which have not previously had support from the QSP trust fund;
- it takes into account whether there had been satisfactory reports on earlier projects involving countries for the second time;
- it seeks to avoid duplication of projects and ensure coverage of different QSP strategic priorities;
- it seeks to avoid an excessive allocation of resources to individual countries; and
- it observes the usual requirements for geographical and sectoral balance.
