

Statement Switzerland

Montag, 29. August 2022

2nd Statement

Institutional arrangement:

- Multi-sectorial engagement
 - Key to achieve a successful post 2020 framework. We support efforts to enhance collaboration, get out of the silos and to bundle forces, resources and knowledge.
 - In this regard, we support the proposal that IOMC - Organisations are co-conveners for ICCM 5
- Financing secretariat
 - Evaluation has shown that SAICM secretariat is underfinanced > Secretariat is the backbone
 - Proposal on how different stakeholder groups can contribute to financing contain in the document
 - Open to consider on how to achieve this > however important is that we achieve to establish a secretariat that is well funded, well connected within the C&W cluster
- loC
 - Key element
 - We support the call issues by others to continue with the loC & EPI that we have agreed on so far.
 - However, we also acknowledge that the progress achieved so far was not sufficient
 - We therefore suggest to use ICCM 5 to energize our efforts to achieve a bigger impact on the loC
 - In particular, we suggest to agree at ICCM 5 on targets, indicators and a PoW for each loC > this will allow to make the objectives clearer and to track progress.
 - This could be the basis to consider at ICCM 6 the current loC and decide if changes are required.
