

Strategic Approach
to International
Chemicals Management

Distr.: General
9 September 2011

Original: English

**Open-ended Working Group of the International Conference
on Chemicals Management**

First meeting

Belgrade, 15–18 November 2011

Item 5 (a) of the provisional agenda*

Implementation of the Strategic Approach:

**Evaluation of and guidance on the implementation, review and updating of the
Strategic Approach**

**First progress report on implementation of progress in
implementation of the Strategic Approach: Detailed results for the
data collection for 2009 and 2010**

Note by the secretariat

The secretariat has the honour to circulate in the annex to the present note the detailed supporting data to document SAICM/OEWG.1/INF/2. This is presented as a series of tables for reference purposes providing the detailed results from the data collection on progress in implementation conducted for 2009 and 2010. The data are provided for the information of participants.

* SAICM/OEWG.1/1/Rev.1.

Annex

Index of tables providing detailed results from the preliminary data collection on progress in implementation of the Strategic Approach

Table number

- | | |
|----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| A | Summary table showing correlation between different parts of the online data collection form, the adopted indicators for reporting and the tabulated results |
| 1 | Number of countries (and organizations) implementing agreed chemicals management tools: use of guidance tools and materials published by participating organizations of the IOMC (Indicator 1) |
| 2 | Number of countries (and organizations) implementing agreed chemicals management tools: new tools or guidance materials published to implement risk reduction in selected subject area (Indicator 1). |
| 3. | Number of countries (and organizations) with mechanisms to address key categories of chemicals: Categories of chemicals prioritized for risk management (Indicator 2) |
| 4. | Number of countries (and organizations) with hazardous waste management arrangements: parts of waste management cycle covered by legislation (Indicator 3). |
| 5. | Number of countries (and organizations) with hazardous waste management arrangements: waste streams addressed through legislation or permits (Indicator 3). |
| 6. | Number of countries (and organizations) engaged in activities that result in monitoring data on selected environmental and human health priority substances: types of monitoring covered by established arrangements (Indicator 4). |
| 7. | Number of countries (and organizations) having mechanisms in place for setting priorities for risk reduction: types of exposures taken into account through a science-based assessment before chemicals are placed on the market (Indicator 5). |
| 8 | Number of countries (and organizations) having mechanisms in place for setting priorities for risk reduction: scientific committee, body or institutes involved in setting priorities for risk reduction before chemicals are placed on the market (Indicator 5). |
| 9. | Number of countries (and organizations) having mechanisms in place for setting priorities for risk reduction: programmes for management of priority risks (Indicator 5). |
| 10. | Number of countries (and organizations) providing information according to internationally harmonized standards: standards and requirements for labelling hazards and risks at different stages in a chemical's life-cycle (Indicator 6). |
| 11. | Number of countries (and organizations) providing information according to internationally harmonized standards: conformity with the Globally Harmonized System for the Classification and Labelling of Chemicals - the GHS (Indicator 6). |
| 12. | Number of countries (and organizations) that have specific strategies in place for communicating information on the risks associated with chemicals to vulnerable groups: activities to communicate chemical safety issues to vulnerable groups (Indicator 7). |
| 13. | Number of countries (and organizations) with research programmes: commissioned or funded research during 2009-2010 on chemical safety (Indicator 8). |
| 14. | Number of countries (and organizations) with websites that provide information to stakeholders: publicly available information on selected topics (Indicator 9). |
| 15. | Number of countries (and organizations) that have committed themselves to implementation of the Strategic Approach: demonstrated expressions of commitment (Indicator 10) |

16. Number of countries (and organizations) with multi-stakeholder coordinating mechanism reporting or providing information on chemical safety, including SAICM (Indicator 11).
17. Number of countries (and organizations) with multi-stakeholder coordinating mechanism reporting or providing information on chemical safety, including SAICM: participation of non-governmental organizations in national committee or advisory group (Indicator 11).
18. Number of countries (and organizations) with mechanisms to implement key international chemicals priorities: instruments of the ILO (Indicator 12)
19. Number of countries (and organizations) with mechanisms to implement key international chemicals priorities: instruments of the IMO (Indicator 12).
20. Number of countries (and organizations) with mechanisms to implement key international chemicals priorities: instruments of UNEP (Indicator 12).
21. Number of countries (and organizations) with mechanisms to implement key international chemicals priorities: Rotterdam Convention on the Prior Informed Consent Procedure for Certain Hazardous Chemicals and Pesticides in International Trade (Indicator 12).
22. Number of countries (and organizations) with mechanisms to implement key international chemicals priorities: Convention on the Prohibition of the Development, Production, Stockpiling and Use of Chemical Weapons and their Destruction, 1992 (Indicator 12).
23. Number of countries (and organizations) with mechanisms to implement key international chemicals priorities: International Health Regulations, IHR, 2005 (Indicator 12).
24. Number of countries (and organizations) with mechanisms to implement key international chemicals priorities: instruments of the UNECE (Indicator 12).
25. Number of countries (and organizations) providing resources to assist capacity-building and technical cooperation with other countries: financial resources (Indicator 13)
26. Number of countries (and organizations) providing resources to assist capacity-building and technical cooperation with other countries: in-kind resources (Indicator 13)
27. Number of countries (and organizations) that have identified and prioritized their capacity-building needs for the sound management of chemicals: types of plans completed or updated in 2009 or 2010 (Indicator 14).
28. Number of countries (and organizations) engaged in regional cooperation on issues relating to the sound management of chemicals: regional cooperation agreements (Indicator 15).
29. Number of countries where development assistance programmes include the sound management of chemicals: national development plans for 2009 and 2011 that address priority needs for chemicals (Indicator 16).
30. Number of countries (and organizations) with sound management of chemicals projects supported by other than Quick Start Programme funding (Indicator 18).
31. Number of countries (and organizations) having mechanisms to prevent illegal traffic in toxic, hazardous and severely restricted chemicals individually: activities in place in 2009 and 2010 (Indicator 19).
- 32.¹ Number of countries having mechanisms to prevent illegal traffic in toxic, hazardous and severely restricted chemicals individually: measures taken for specific individual hazardous substances (Indicator 19)
33. Number of countries having mechanisms to prevent illegal traffic in hazardous waste: activities in place in 2009 and 2010 (Indicator 20).

¹ Note the adopted indicators 19 and 20 only refer to Governments

Table A
Summary table showing correlation between different parts of the online data collection form, the adopted indicators for reporting and the tabulated results

SAICM objective	Indicator	Short indicator name	Question numbers in tool/questionnaire							Tabulated results See OEWG.1/2/Add.1								
Identity of respondent - Part 1																		
Risk Reduction Part 2	1	Use of chemical management tools	2.1								1	2						
	2	Key categories of chemicals subject to risk management	2.2								3							
	3	Hazardous waste management arrangements	2.3								4	5						
	4	Periodic monitoring	2.4								6							
	5	Setting priorities for risk reduction	2.5								7	8	9					
Knowledge and Information Part 3	6	Provision of information to internationally harmonized standards	3.1	3.2							10	11						
	7	Communication on risks to vulnerable groups	3.3								12							
	8	Research programmes	3.4								13							
	9	Websites providing information on chemicals	3.5								14							
Governance Part 4	10	Commitment to implement SAICM	4.1	Plus official SAICM focal points							15							
	11	Multi-stakeholder coordination mechanisms	4.2								16	17						
	12	Implementation of international priorities	4.3	4.4	4.5	4.6	4.7	4.8	4.9		18	19	20	21	22	23	24	
Capacity building and technical cooperation Part 5	13	Bilateral capacity building and technical cooperation support	5.1	5.2							25	26						
	14	Priority setting for capacity-building needs	5.3								27							
	15	Regional cooperation on the sound management of chemicals	5.4								28							
	16	Development assistance programmes that include chemicals	5.5								29							
	17	Capacity-building projects supported by the QSP	Secretariat QSP database sources															
	18	Capacity building projects supported by other sources	5.6								30							
Illegal International traffic Part 6	19	Illegal international traffic in chemicals	6.1								31	32						
	20	Illegal international traffic in hazardous waste	6.2								33
