Dear SAICM Secretariat,

The OECD would like to comment regarding paper SAICM/IP.4/7. It is noted that this paper will be updated for ICCM5. This paper mentions the OECD PINE database several times. As information for those who will be updating the paper, the OECD would like to advise that we are currently in the development phase of a chemicals management domain in PINE to capture economic policy instruments related to chemicals management. We encourage the authors to contact OECD (eeva.leinala@oecd.org) at the time of update of the document so that we can provide the latest status of the development of the domain.

Kind regards,
-Eeva
