The IOMC would like to propose the following changes marked in red in the co-facilitators text. They reflect our inputs during the meetings of the VWG but as well is coherent with our previous submission.

At ICCM5:

Agree to an omnibus resolution on the existing SAICM EPIs & other issues of concern that:

i. Recognizes the efforts and progress;

ii. Welcomes the Assessment Report on Issues of Concern made by UNEP following resolution UNEA 4/8;

iii. States the intention to determine and set the path forward on the existing SAICM EPIs and other issues of concern in the beyond 2020 instrument at its next session [ICCM6];

iv. Highlights any immediate and specific priority actions to ensure that efforts and momentum continue where appropriate;

iv: Calls for continued work until ICCM6 and for a report on progress made to ICCM6

v. **Requests** Invites the responsible IOMC organizations, in consultation with stakeholders, to submit a proposal to ICCM6 propose a draft work plan with clear timelines and milestones including: (a) an assessment on how the EPIs and other issues of concern contribute to achieving the Strategic Objective(s) and Targets of the new instrument; and (b) proposing additional indicators as needed for relevant targets; and (c) need to address them as “issues of [international] concern” in the new instrument.

i. From [ICCM6] onwards, notes that any existing EPIs and other issues of concern that continue are taken forward as “issues of [international] concern” under the new instrument would follow procedures that are established for those ‘issues of [international] concern’ under the beyond 2020 instrument.

* The following IOMC members submitted this proposal: ILO, OECD, UNEP, UNIDO, UNITAR, and WHO.
